Education

Bachelor of Computing and Data Science, Alexandria University

Sep 2023 – Jul 2027

- CGPA: 3.441/4.0

Projects

Afia – AI-Powered Nutrition & Wellness App | *Flutter, Firebase, Supabase, Gemini, Groq*

[GitHub Repo](#)

- Led a **4-person team** building Afia, an AI-powered nutrition and wellness app in **Flutter (Feature-First Clean Architecture)**, integrating **Firebase Auth**, **Supabase** (PostgreSQL, Edge Functions, Storage, RLS), and **Gemini/Groq APIs**.
- Integrated AI capabilities achieving response times under **5 seconds** for the Arabic conversational health coach and under **7 seconds** for meal image recognition and nutritional estimation.
- Delivered core health-tracking features – meal logging, hydration, activity metrics, and progress tracking – with a fully localized **Arabic/English RTL experience via Flutter internationalization**.

Web Scraper for Used Car Marketplace | *Python, Selenium, BeautifulSoup, Pandas*

[GitHub Repo](#)

- Scraped **10K+** used-car listings using **Selenium**, extracting structured data across **10 attributes** including brand, model, price, year, mileage, location, transmission, fuel type, color, and date.
- Built a data-cleaning pipeline using **Pandas** to handle missing values, inconsistent formats, duplicates, text normalization, and invalid records, producing a final dataset of **10,623 rows × 10 columns**.

ALU Design and Assembly Programming | *HDL, Assembly, Digital Logic Design*

[GitHub Repo](#)

- Implemented **15+ logic gates** and designed an **Arithmetic Logic Unit (ALU)** capable of executing 4 arithmetic and 3 logical operations.
- Developed low-level **assembly programs**, including a multiplication routine and a screen-filler program to manipulate pixel data and display patterns.
- Simulated and verified all modules using test suites, achieving **100% functional correctness**.

Skills

Technical Skills:

Languages: Python, Java, C++ , Dart, SQL, Bash.

Frameworks: Flutter.

Databases & Cloud: PostgreSQL, Firebase, Supabase.

AI & Data: NumPy, Pandas, Matplotlib, Seaborn, Plotly, Scikit-learn, Power BI.

Other Tools: Git & GitHub, LaTeX.

Software fundamentals: OOP, Data Structures & Algorithms, Algorithm Design, Concurrent Algorithms & Data Structures, Databases (SQL & NoSQL), Computer Networks, Cloud Computing, Operating Systems.

Soft Skills: Problem Solving, Team Leadership, Planning.

Achievements and Certifications

- **Codeforces Specialist** (Max Rating: **1436**), solved **1,600+** algorithmic problems 2024 – Present
- Ranked **5th** within Faculty, **20th** overall on contest day, and qualified to the Finals, ECPC 2026
- Supervised Machine Learning: Regression and Classification, Coursera 2025
- Ranked **5th** within university and **top 15%** globally, IEEEExtreme 2024

Volunteer work

Manager of Problem Solving, IEEE ALEX CSC

Jul 2026 – Present

- Designed a structured learning roadmap covering programming fundamentals, problem-solving techniques, debugging, and algorithmic thinking, progressing toward technical interview preparation.
- Coordinating instructors and mentors while designing session structures, teaching responsibilities, practice activities, and a beginner-focused training camp to build a foundation for advanced problem-solving training.

Problem Solving Trainer, ICPC FCDS

Oct 2024 – Jun 2025

- Facilitated **275 students** in competitive programming by creating **5 video explanations** for problems and answering their questions.
- Created **6 problems** on Polygon using **LaTeX** for contests on **Codeforces**.
- Explained **Monotonic Functions**, **Binary Search** on sorted arrays, and Binary Search on Answer.
